## Tachycardia... in a Baby

### Tumours, Phlebitis, Epilepsy

I first became a member of the RHUMART® Family for my own health reasons. **If I hadn't had the system I would have had to be operated for breast tumours.** I called my good friend Marie-Paule Dion and told her that I felt **I didn't really have a choice - it was time to take control of my own destiny.** And I bought the RHUMART system.

I also had **thrombophlebitis**, and as a result I had to wear shoes with flat heels to work and I was always limping. I couldn't see myself wearing flat heels for the rest of my life, and that was another reason I decided to buy the RHUMART system. I am really happy with the results because **all of these problems have now been resolved!**

**But, for me, the greatest joy of owning the system is being able to help the people around me, whether they be friends, family or neighbours.**

One of my nieces **has had problems with epilepsy since birth. With the unbelievable amount of medication she was forced to take,** her development was really hindered. **Today, with the system, she no longer takes any medication and everything is as it should be.**

Which brings me to the subject of little newborn baby I was able to help. When this baby was born, the doctors said she would be **clinically and medically**

**handicapped for the rest of her life.** She had a problem with her heart, and the **cardiologists were unable to control her heart rate.** Her heart was beating twice as fast as it should have been: it was beating between 150 and 300 times a minute. You can imagine what effect this had on the baby. **Her hands were blue, her nose was blue - everything.** The parents were warned that one day they might find their little girl dead in her bed.

**With the RHUMART system we were actually able to control her heart rate. It's almost unbelievable!**

I placed the baby on the shoulder of her mother (my niece) and we worked with the rings and very low parameters: A2-n2-T2.

So, by treating the child with the mother, we were able to kill two birds with one stone. However, the system belongs to my sister-in-law and my niece goes to her place for the conditioning sessions. Since Thursday my sister-in-law has been on vacation, and we have noticed that the baby's heart rate has started to go up again.

**So, in our family, everyone is convinced that this system helps them to feel better, and that it is responsible for saving the baby's life.** They were able to see for themselves that when they **didn't use the system, the baby became sick**

**again.** It's really extraordinary, and I am a very big fan of RHUMART too.

**To me, this is really a system that restores life and allows us to live in a more positive and harmonious way.**

**There are twelve people in my family, and I am just about to sign my eighth contract with the family members.** Almost everyone has their own RHUMART system, and those who don't have one yet are saving their money to get one.

**When you really understand that traditional medicine does its best but that it has its limits, you realize that with this system you can solve problems that you never thought could be solved.** So, use your system and share it with the world. It's absolutely wonderful and **I thank Dr. Drolet, because I think it's the greatest gift he could have given our planet.**

*English translation: Deborah Blythe*

# Breast Cysts...

We run a clinic in Granby. We have several arthritis cases, but I don't think any more needs to be said on that subject. It's so obvious! And people get results.

I want to talk to you instead about a 31-year-old woman who had so many cysts in her breasts that the doctor refused to remove them. It was a type of cyst that was likely to return anyway, even if he operated. So he simply told her, "When you can't stand it any more, we'll remove them. But not just cysts, the breasts too!"

She was absolutely desperate. Naturally, it was very painful. Some cysts were as big as a lemon; it was really something. I gave her RHUMART conditioning for about two months.

***"Believe or not, the cysts have completely disappeared!"***

Believe it or not, the cysts have completely disappeared! She has no more pain and the cysts have not come back in the last three months.

I didn't just treat the breasts, though, because I realized that the problem involved more than just breasts themselves.

I first used the "MAXI" (around the digestive system) for ten minutes on "n2". Then I used the "REBONE 4A's" directly on the breasts for another ten minutes at "A5, n2." I gradually increased to "n3" and after a few sessions at this frequency we achieved the results we were aiming for.

*I don't need to tell you how happy she is!!!*

# Nervous Breakdown, Multiple Sclerosis

I know a woman who lived with a nervous breakdown for fifteen years; she took medication and her whole world revolved around her bedroom and her kitchen. She never went out. A month ago she started to have RHUMART cellular conditioning sessions. Already, she has started to take a lot fewer pills; she has begun to enjoy life again and she even leaves the house with her husband. She goes to restaurants, she goes to mass, she invites friends to her home and she cooks. There has already been a dramatic improvement.

Just imagine - her doctor told her that nothing could be done, that she would require long-term hospitalization!

I also know several people with multiple sclerosis. They are doing fine since RHUMART is restoring their natural equilibrium, giving them strength and stimulating their self-defense mechanisms. One woman, who has had multiple sclerosis for fifteen years, had been in a wheelchair for five years. She couldn't walk and she had no feeling in her hands and feet.

After ten or twelve conditioning sessions - I know you'll say that that's unbelievably fast, that it's extraordinary - she began to walk again. She began to regain feeling in her hands, and she even took her husband's car out on the weekend!

**LISETTE BERTRAND**, Québec,  
February 1989 Cassette - Ri-T3 (in French)

*English translation: Deborah Blythe*

***"After ten or twelve conditionings...  
...she began to walk again."***

## 80% Paralyzed

*Backaches, Generalized Neuralgia,  
Eczema, Acne Rosacea, Circulation,  
Physical Conditioning*

***“If Ben Johnson had used this system instead of steroids, he would still have his gold medal today!”***

*(Francine Bernier)*

**Ben Johnson**

I've always had back problems, even when I was little.

In 1973, when I was giving birth to my second child, my doctor gave me a peridural injection without discussing it with me first. Afterward I couldn't stand up.

In November, 1974, I couldn't sleep. I couldn't remain in any position - standing, sitting or lying down - for very long.

My entire left side was 80% paralyzed - I was heading for a wheel chair. I was 29 years old.

In March, 1980, I decided to see a chiropractor. He told me that he couldn't do a thing for me. In fact he said there wasn't a chiropractor in the world who would be willing to touch me in the state I was in. I had neuralgia in every bone - from my head to my feet. My bones felt as though they were about to disintegrate.

So I began having RHUMART conditioning sessions every day.

Just sitting in my car required an almost superhuman effort.

After only one week of RHUMART conditionings there was already a lot less pain! After that, my condition continued to steadily improve - day by day, week by week, and month by month. TWO MONTHS later the pain was completely gone.

The following winter I started skiing again - downhill and cross-country. Then the next summer I was back on the golf course. And I haven't stopped since!

Since then, I haven't had the slightest back problem, and I wear my high heels from morning to night.

My left side, which was 80% paralyzed, is now much stronger than my right side. As for side effects, I was really lucky! The eczema which I had had since childhood has completely disappeared. My acne rosacea has also disappeared. And the best part is that I have never, ever had the slightest problem since.

If Ben Johnson had used this system instead of steroids, he would still have his gold medal today!

**FRANCINE BERNIER**, Québec, February 1989  
cassette Ri-T7 (in French)

*English translation: Deborah Blythe*

# Arthrosis, Crohn's disease, Diabetes, Herniated disk

***"The RHUMART System - it's priceless!"***

## Arthrosis

I was suffering from degenerative discopathic arthritis, especially in my kneed and upper spine.

I had heard about the RHUMART system from one of my cousins and I bought it after a meeting with Marie-Paule Dion.

It took a month and a half of conditioning with the RHUMART AUTO-SANTÉ System before I began to feel a difference in my back. After a month and a half I had very severe pain. **Then, from one day to the next, the pain disappeared.**

Since then, **I have been able to sit down, lie down, and sleep through every night. Before using the RHUMART conditioner I was only able to sleep for five or six minutes at a time.** Since August 1989 I have felt great.

ANDRÉ BUREAU Québec, March 1990  
Cassette Ri-T6 (in French)

## Crohn's Disease

One of my cousins was suffering from Crohn's disease and she decided to try RHUMART cell conditioning. After only **two and a half month** her condition has improved quite a bit.

## Diabetes

I was diabetic and after my first RHUMART conditioning I noticed a reduction in my blood sugar. I decided to buy my own RHUMART system, and after the third session I actually became hypoglycemic. I stopped taking my pills and I haven't taken a single pill since then. Instead, I condition myself with RHUMART.

## DEAFNESS

### *Buzzing in the ears*

A lot of people came over to try my new RHUMART system. One man, Mr. Jean-Louis St-Pierre, was deaf in one ear and had a constant buzzing sound in his other ear. He had seen several doctors and they had told him that he would have to wear a hearing aid because his cells were all dried out.

He came to our house for RHUMART conditionings for a month and a half. When he went back to Québec for tests they told him, "Everything is fine."

## Herniated Disk

### *In a Cow*

At a conference I met a woman who said, "Mr. Bureau, we have a cow **with a herniated disk. The doctor told us to have it put down.** Can you help us with your RHUMART system?" I said, "My system is for humans; I don't have the right pads." However, I went anyway. The cow was on the ground and unable to stand. The next day it stood up, but fell down after a few steps. After a week it was still limping. **And after eleven conditionings, the cow is "first class."** She has just been "serviced" again and is doing fine.

## Conclusion

In the beginning I didn't want to meet the "vendor." I thought I had spent enough money on my back, and that RHUMART was just another worthless product. Today I think that the RHUMART system **is priceless.**

*English translation:  
Deborah Blythe*

## Varicose Ulcer, Salmonella

***“It's impossible! She was dying - she would have died!”***

### **Varicose Ulcer**

***She had a lesion big enough for her doctor to stick his finger in up to his knuckle. I saw him signal to the nurse:***

***«the leg has to come off»***

LAURA DION, Little Sister of the Holy Family  
Montréal, Sept. 1989, Cassette Ri-T4  
(in French)

I am Laura Dion Little Sister of the Holy Family in Sherbrooke. I'm not selling anything and I'm not a star: that's not what I'm here for.

Last fall one of our nuns, age 80, had a varicose ulcer on the side of her leg. She was in terrible pain. "What are you waiting for?" I said. "For them to cut her leg off, maybe? She needs RHUMART conditioning."

She had been suffering for two months like that. After her first RHUMART session she could already feel the benefits. Every day she came, without fail. She would say to me, "There are all kinds of little nasties in there! It's awful."

I wasn't too confident about what would happen because, to make matters worse, she also had phlebitis. She had a lesion big enough for her doctor to stick his finger in up to his knuckle. One day I saw him signal to the nurse: "the leg has to come off." There was nothing more to be done there.

Although the wound was carefully dressed, there was so much discharge that it would run down her leg; sometimes I would see her shoe covered with blood.

Her condition slowly improved. The pain disappeared. Sometimes she would say, "It hurts a lot today." Then after the session she would say, "the pain is gone." That was very encouraging for her.

But it took time for such a deep wound to heal. After three weeks it started to dry up and heal; the wound closed and scab formed. In any case, the pain was gone. She was encouraged, and so was I.

After about two months the doctor confirmed it: "It's completely healed." He doesn't understand what happened, but I do!

### **SALMONELLA**

A little later something really special happened with this same 80-year-old sister who had been "treated" with RHUMART. She was infected with Salmonella and the

doctor wanted to hospitalize her.

The nurse said, "No, let her die here. She'll receive better care here than at the hospital."

You can guess what we did... When the doctor had tests done, they were negative. He still doesn't understand what happened!

***“It's impossible! She was dying - she would have died!”***

I said, "I understand; it's because she used RHUMART"

***“I hope this whole thing... snowballs! ”***

*English translation: Deborah Blythe*

# Arthrosis, Herniated Disk

**"Scepticism is the biggest mental handicap we run into with this system"** (Marie-Paule Dion)

MARIE-PAULE DION • Québec, March 1990  
Cassette Ri-T6 (in French)

*They say that weak people have problems and strong people have solutions. I think you all have solutions now since you have all purchased your own RHUMART system. So now you can all be counted among the strong. Congratulations!*

## Arthrosis

My own personal health problem was **arthrosis**. It took a long time to resolve this problem - it took me at least six months. I was 16 when I began to develop arthritis in the spinal column and I have had it ever since.

**I had seen five doctors; they had all diagnosed arthrosis and said I would have to take medication for the rest of my life. When I first learned about the RHUMART system I was 48, and I am 49 now. It is going to be a pleasure to celebrate my fiftieth birthday with RHUMART because I feel great! Aging like this, in perfect health, is absolutely no problem. You can bring on the years, because I'm ready for them!**

## Scepticism

It seems to me that the **greatest handicap we run into is a mental handicap: scepticism about this system.** I believe that this is one of the greatest inventions in the world today. I have owned the system since June 21, 1988 and I keep meeting people who continue to get results.

**Last week, in Cowansville, I had a meeting with 70 clients and not one of them had a complaint; everyone was very happy with the system.**

## Herniated Disk

*At the operative stage*

I would like to tell you about a man in Val d'Or who was suffering from a **herniated disk**. One of his disks had almost completely disintegrated and was out of position. **He needed an operation. I said, "Go ahead - there's no problem; but first, try RHUMART."**

**When it was time for the operation, the doctor discovered that the disk had completely regenerated after two months of RHUMART conditioning. The operation was over at 11:30 a.m. and by the evening he was walking around. The next morning he took a shower and ten days later he left the hospital.**

As you know, anyone who has had surgery on the spinal column cannot drive a car for at least two months. Well, he drove the whole way from Montréal to Val d'Or. He even rides horses. **Now he has another problem: he can't collect his disability insurance because they are accusing him of lying on his claim when he says that he had this problem for 13 years. Everyone knows that a disk can't regenerate like that... As a result, he'll probably have to go to court.**

Thank you for joining the growing RHUMART family and for continuing to spread the good news.

And a big thank-you to Dr. Drolet!

*English translation: Deborah Blythe*

## Multiple Sclerosis

**My problem was multiple sclerosis.** It started in 1983. I was still working then, but I was having trouble walking. I was in the maple syrup business and I owned a maple grove. I would get caught on the slightest little branch and I was falling down. There was obviously something wrong, and I also had pain in my spinal column.

NOËL DUCHESNE, Québec, March 1990  
Cassette: Ri-T5 (in French)

Since I didn't have cancer, I continued to work, but in 1986 I was really starting to have problems. **I consulted my family doctor and he's the one who told me I had multiple sclerosis.** It seems that **inflammation of the spinal cord is very similar to MS.** I had seen some cases in my parish so I wasn't really surprised.

I started to take things more slowly, but it was too late. **Since traditional medicine couldn't help me,** I started to look elsewhere: **I saw a chiropractor, an acupuncturist, some "healers" ... I tried just about everything.**

**I bought my RHUMART system on November 3, 1989.** I must admit that before buying it I had tried it out somewhere else for a month without a lot of success. But when I brought it home I really went all out. However, it's possible to have too much of a good thing. A cup of coffee is stimulating, but a pot will make you a nervous wreck!

The first week everything was fine; I went to my sugaring-off cabin and I stacked wood, but it didn't last. I called Dr. Gagnon and he advised me to stop the conditioning sessions for a week and then to start again more slowly.

**Now things are going well. I am walking better. My legs don't hurt. I have lost that numb feeling in the soles of my feet, and I have no pain in my spine. I believe that I have the RHUMART system to thank for my improvement!**

## CANCER

I would also like to tell you about a case that is very close to my heart. **It's the case of my good friend Raymond Plante, who has cancer.** I had had my system for a few days when I met him; **he was leaving his doctor's office, "stuffed" full of cortisone, and his neck was as thick as his head.**

**Raymond could hardly walk;** his son practically had to drag him. I told him, "Raymond, I will come to your house with my system."

I went to his place for twenty days. Raymond couldn't get out of bed. His wife would wash him and bring him his food. She was discouraged. But Raymond was confident. He would say, "I'm sure we're going to get some results with this."

**After twelve days, Raymond was able to sit up.** I got there in the morning and found him laughing. He said, "Things aren't too bad." The next morning he was a little better. **After fifteen days, Raymond walked around the table with his cane; he thought it was funny. On the twentieth day, he came to my house for his conditioning.** When I started the sessions, **on November 10, he had a malignant tumour at the base of his spinal column, one under his arm and another on the side of his head. He also had a lump under his arm.**

**On November 30 he went to the CHUS for a follow-up examination. The medical specialist tried to find the lump. Raymond said, "It must be on the other side." The doctor answered, "No, it was on this side." But he couldn't find it!**

I'm not saying that Raymond is cured; he has just had a "scanner" test and we're expecting very positive results.

*English translation: Deborah Blythe*

## "It's amazing to see something like that!"

(Hélène Dufour)

### **Bursitis, Tendinitis**

I've had my system for just three months and I've already encountered many incredible cases. **Cases of bursitis, for example - people who had suffered year after year, season after season; three conditioning sessions and the bursitis simply disappeared.**

**The same thing with tendinitis: four sessions and it often disappears.**

### **Sniffling**

I'd like to tell you about the case of a little 6-year-old boy. He had been sniffling since the age of two. His mother had taken him to all kinds of specialists at every level, but they weren't able to help.

**I gave him four RHUMART conditioning sessions with the MINI-4As on the frontal and temporal sinus passages. And he doesn't snuffle any more.**

### **Tumour**

I am also helping a woman with a tumour on her spinal cord. She is in a lot of pain. So far she has received eight RHUMART sessions and for the first time in two years she can say, "I can sleep, I feel well, I can function, and I can work." Excellent results!

### **Cysts, Rheumatism, Arthritis**

With the MINI-4As I've had the same excellent results with cysts, rheumatism and rheumatoid arthritis.

**I have seen a man with half-inch lumps on his feet, and they have disappeared. Using the "MINI-4As" I worked on each cyst, one at a time. It's amazing to see something like that!**

For those who are interested in knowing the parameters I used, here is what I did: for the first two sessions, I used the MINI-4As for 10 minutes at A1 and n2; after that I alternated: 5 minutes at n2 and 5 minutes at n3.

### **Shingles (in the eye)**

Another case: a 73-year-old woman with shingles.

**She was in agony and couldn't see a thing.**

I said, "What is that you have, dear?"

**"It's shingles. No-one can do a thing for me. You can't touch the eyes."**

**I suggested that she try the RHUMART system. I was curious to see exactly what it could do.**

**After only three conditionings the shingles have almost completely disappeared, and she can see.**

**I used the MINI-4As at A1 and n2 and I also did one conditioning with the REBONE-4A (to cover the eye) at amplitude A1 for one minute and the rest with the MINI-4As. I am really very happy to see as much wonderful results.**

**HELENE DUFOUR**, St-Hyacinthe, September 1988  
Cassette Ri-T1 (in French)

*English translation: Deborah Blythe*

## Tachycardia, Back Problems

***"I wonder why they should continue to suffer, when we have such an extraordinary system that transforms pain into smiles!"***  
*(Rémi Dumont)*

### ***Tachycardia***

I have owned the RHUMART system for one month, but I must admit that it wasn't me who bought it: it was my wife.

***She was sold on the RHUMART system when my tachycardia disappeared after two sessions!***

I have been using it regularly for a month: my backaches have disappeared and I can play golf every morning with no problem. And we've also been able to help others.

### ***Back Pain***

I was able to help a French teacher who had been suffering terribly for some time. She had had to take a leave of several months' absence from work in the previous year. **She had very severe back pain;** she could no longer perform her supervisory or disciplinary duties at school, and individual help for students was out of the question. **She even needed a special chair to help get through her days in the classroom.**

**She had had to give up all her regular activities and sports: tennis, running, bicycling, swimming...**

**After one week of conditioning sessions her friends from work met her on the street on a bicycle.**

**She said, "It's Rémi who cured me."**

It wasn't really me. It was the conditioning sessions. **Two weeks later she started playing tennis again.** And that's a pretty demanding sport!

**I would like to see her go so far as to buy her own RHUMART system.** She would benefit enormously and she would also be able to help her family.

**There are so many people who need help, and I wonder why they should continue to suffer when we have such an extraordinary system that transforms pain into smiles!**

RÉMI DUMONT, Québec, August 1989  
Cassette Ri-T3 (in French)

*English translation: Deborah Blythe*

## VI. Extracts from RHUMART® Testimonials

**"The medical diagnosis was in:  
there was talk of an eventual colostomy."**

***That's when I said, "No thank-you."***

### ***Ulcerative Colitis***

**I had ulcerative colitis: I had one ulcer in the anus and three in the stomach. The medical diagnosis was in: there was talk of an eventual colostomy. That's when I said, "No thank-you."**

**I came to a RHUMART meeting with Mr. Turcotte.**

**Dr. Drolet did such a wonderful job of explaining the central nervous system!** He explained how the nerve impulse leaves the head and travels down the spinal column. At the end of the nerve cell there's a synapse which gives a kind of little jolt to the cells; that's when you have a nerve impulse.

**Since I'm a very visual person I had no problem picturing all this in my head. I said to myself, "It's true."**

**I didn't hesitate. I bought the system. Now I have no pain in my anus and I have an 80% improvement on my right side.**

### ***Herniated Disk***

**I have a friend who had a herniated disk but who had no faith at all in bioelectricity. I said to her, "Before being operated why don't you at least give it a try?"**

She arrived at my place bent over double and filled with doubts. After three conditioning sessions she feels 80% better.

**So as far as I'm concerned, Dr. Drolet, what you tell us is true!**

**LUCIE GILBERT**, Québec, September 1989  
Cassette Ri-T3 (in French)

## Ear Infections

### PREVENTION, Relaxation, Sleep

I got ear infections all the time when I was a child. My sister here can confirm it. I had one or two infections every year. We treated them with antibiotics, but they always came back. At about the age of twelve, I decided to stop taking medication. I kept some aspirin in case of emergencies, and I went with the RHUMART system.

The RHUMART system is also great for prevention and general well-being. I use it every night - it relaxes me, and helps me to sleep better. And when you don't have a lot of time for sleeping, a short RHUMART session does the trick!

You sleep for five hours and feel like you've slept for twelve! It's amazing!

I'm 17 now and I haven't had a single ear infection since.

## Juvenile Diabetes

## Ménières Disease

Hello! I'm going to tell you about a **three-year-old boy with juvenile diabetes. He had to have injection twice a day and sometimes even at night.**

**His doctor at the C.H.U.S. said that if the little boy used the RHUMART system, he would have nothing more to do with him. His parents finally found a diabetes specialist in Québec.**

He has been using the RHUMART system for about a month and a half now.

He places the pad over his pancreas. **Now he only needs a single injection in the morning.** His blood sugar level used to go as high as 15; now it is 2. His doctor is very pleased with the results.

I also know a man who suffered from **Ménière's Disease.**

For the last five years he hasn't been able to leave his house. **One of the symptoms of this disease is loss of balance. His doctor even visited him at home because he was always falling down.**

**His hand also trembled a lot. One evening I used the rings on him - just five minutes at amplitude 2.**

**Since then he doesn't tremble at all.** He can even play the violin now.

## Angina, Chronic Pain in the Back and Arms

# HEART PATIENT At the Operatory Stage

**WALLACE LAPIERRE** • Québec • February 1989 • CASSETTE Ri-T7  
(in French and English)

I am a Christian missionary. I have suffered from angina for the last ten years, and I haven't been able to engage in any physical activities at all. In June 1988 I went to see my doctor in Tracadie. He wanted to send me to Montréal for open-heart surgery. I heard about the RHUMARTsystem from a Little Sister of the church in Matane.

I had suffered from back pain for the past twenty years as well as from pain in my arm for about a year. I asked the Sister if she would give me at least four conditionings during the four days that I would be in Matane.

After only two sessions I had no more pain in my back or in my arms.

I then turned my attention to my heart. I had been taking medication for ten years and now I was facing open-heart surgery.

I called Dr. Gagnon and talked to him about the RHUMART system. When I got home I talked to my wife: "I've been suffering for ten years like this. Don't you think we should buy this system?"

When we counted up all the money I had spent on medication in the last ten years we realized that I had spent:

**TEN THOUSAND, ONE HUNDRED THIRTY FOUR DOLLARS on pills !**

And I was still faced with an operation...

So we met Dr. Gagnon in Montréal. He taught us how to use the system and we went home with our new RHUMART AUTO-SANTÉ System. And I began my conditioning with it.

I always start my RHUMART sessions with the parameters 6-2-10 (Amplitude 6, Modulation 2 for 10 minutes).

After two months I decided to start reducing my medication.

**I was taking ISORDIL,  
LOPRESOR and CARDIZEM.**

I was feeling pretty good and I didn't think I needed so much medication.

I started skipping doses of Cardizem first, then Lopresor, then the others, cutting down very gradually. My wife, Gaétane, had read in Dr. Mongeau's " Dictionnaire des médicaments" that it might be disastrous to stop all at once.

When I reached the point where I was taking only one of each kind of pill every morning and every night I went to see my family doctor. I told him what I had been doing.

"Don't do that, Mr. Lapierre: your heart may work fine for a while, but later it could start seizing up and you might have a heart attack!"

"Yes, but I feel fine. Have you ever heard of the system invented by Dr. Drolet in Québec? I bought it and I'm treating myself with that."

"Mr. Lapierre, don't be so ready to believe in miracles. It was your heart that created new veins - it did its own bypass."

He gave me a one-year prescription. He even increased the dosage because he knew I was going to take less than he prescribed. He knew this because before I had been taking three pills every three hours. If I had listened to him, I would have apologized for not taking the pills. But I told him that I would continue to do the same thing as long as I was feeling good.

*Today I can even run up a flight of stairs with no problem. It's really extraordinary!*

**"I was a heart patient, and now I can do almost everything that the rest of you can do."**

*English translation: Deborah Blythe*

# CAR ACCIDENT

## Chronic Pain

I had a **car accident in 1979**. It was a work-related accident.

The C.S.S.T. granted my disability claim. I said, "That's all very well but I'm not cured. I'm still in pain."

My trapezius muscle was swollen from the front all the way around to the back. It was very painful. **I couldn't sleep on my right side any more because my three fingers would swell up right away.**

They told me, "You'll be given a sum of money and you'll have to learn to live with the pain."

"Yes but what then? Do you have something else?"

They said, "Yes, we have something; we have medication. You're just going to have to accept the fact that you'll have to take it from now on, and you'll come back here for check-ups."

**Well, after ten years of taking medication** and having my children rub my shoulders with inflammation-reducing ointments, and all the rest of it, my brother bought a RHUMART system. I used his system for a few months, it helped a lot, and I bought my

own.

I can't really say that I'm 100% better because my spine is still twisted.

But what I can say is that before, when I drove a car, the slightest little bump in the road was agonizing for me. Now, I drive my car, I get around, I do what I want to do, and I can sleep on my right side or my left side - it doesn't matter.

**As far as I'm concerned, it's a 100% improvement.**

## CYSTIC FIBROSIS in a child

**RHUMART really works for him. He has developed a lot - he's grown and he's gained weight.** Just last week he said to me, "Look at my knuckles - my fingers are getting fatter." Things are really going well. When he was tested last summer his lungs weren't in very good shape. his respiration was good but **the doctor said:**

**"His respiration won't stay this good for long if his lungs continue to deteriorate."** I saw the pneumologist again last November. His respiration had improved so much that the doctor didn't even take any lung X-rays.

**Things are really going well with RHUMART.**

## Generalized Rheumatoid Arthritis

**URBAIN FAUCHER**, Québec, March 1990  
Cassette Ri-T6 ( in French)

I had pain in all of my joints for two years. I went to see my doctor and after several examinations he said, "**You have gout.**"

He gave me some painkillers, but a month later the pain was worse and I couldn't work at all any more. That was a year ago.

I wasn't satisfied with the way things were going, so I went to see a specialist at the CHUL. He diagnosed **generalized rheumatoid arthritis**. They began treatments but there was no improvement. Five months later I couldn't work at all, I needed a chair to help me walk around the house, and it was almost impossible for me to go down to the basement.

I met an Independent RHUMART Distributor through some friends. I had nothing to lose, so I started to go for conditionings. After about 15 sessions I noticed that my pain was beginning to disappear. I could sleep better at night and my joints felt better.

But my hands were so swollen that I couldn't even close my fist. When I saw that, I came to a conference and I bought my own system. That was in August, 1989.

At that time I had been taking **GOLD SALTS** for two months and **I was getting an injection every week.**

I continued to do conditionings every other day and I continued to feel better. I slowly started to reduce my medication and things were still improving, so I told my doctor, "I'm going to stop taking the gold salts altogether and I'm going to just use my RHUMART system."

He answered, "There's not much I can say. I've heard of RHUMART, but I don't really know what to tell you." So I asked him, "What do you think?"

He said, "**If you want to get better, anything is worth a try.** I'm going to give you a report to give to your rheumatologist." I said, "Don't mention RHUMART in your report."

I went to see my rheumatologist. She examined me and said, "You're doing fine. Continue with your gold salts. I think you're doing much better than you were." I said, "That's great. I'll keep taking them." I had completely stopped taking the gold salts two weeks earlier.

I went back home and told my family doctor, "I'm not going to take them any more. If I have to come back once in a while, I'll come back." **He knew very well that the medication was damaging my eyes. I was taking antibiotics and I stopped taking them too.**

***"It's been two months since I stopped taking any medication."***

***"I'm back at work and everything is great."***

## Rheumatoid Arthritis and... a RHUMART® Child

*“For ten years I was taking up to 100 Indocid a month.”*

When I was 27 I started to have pain in my knees, my ankles, my elbows and my hips. A doctor told me, "It's rheumatoid arthritis." It got worse every year and I started to limp.

I started to take physiotherapy at a general hospital in Québec, but I had to stop - it was too painful.

**I heard that chiropractors were good for these kinds of things. I invested a lot of money in that - a big fat zero.**

**The same thing with acupuncture. A lot of money - no results.**

With nuclear medicine my rheumatologist determined that I had **arthritis in the elbows, the hips, the lower spine, the knees - just about everywhere.**

He said, "You have no choice. Continue your medication."

I was taking up to five Indocid a day and I was still in a lot of pain. At that time our bedroom was in the basement. I always let my wife go down first: I didn't want her to see me going down the stairs.

It was terrible. I missed at least 15-20 days of work every year.

One day I had a chance to talk to Dr. Drolet on the telephone. I asked him if bioelectric medicine was good for arthritis.

In February 1992, there are at least two RHUMART® children: They are the RHUMART® results that Dr. Drolet is most proud of. Also, thanks to the mother who helped in many ways.

My wife and I met him that very night. Afterwards, my wife said, "We're going to come back tomorrow and buy the system."

And so I began my conditionings. Soon I began to drop one or two medications a week. For ten years I had been dosing myself up with 100 Indocid a month.

I have had my RHUMART system for two and a half years now and I've completely stopped taking any medication.

Now I celebrate the anniversary of the day when I bought my AUTO-SANTÉ. It's the best investment I ever made.

### **A RHUMART® Child**

Because of my health problems, my wife and I had decided not to have children. For the last five or six years we hadn't even given it a thought.

One year after buying my RHUMART system things were going so well that I made a suggestion to my wife: "Why don't we have a baby?" Today we have a 12-month-old little girl - thanks to RHUMART!

You can be sure that if I hadn't had my RHUMART at home, I wouldn't have this little girl now (in 1992, we have two children).

Also another reason I'm pleased is that the inventor of this system is a Quebecer. If he had been German or American, I might still be at home tonight with my rheumatoid arthritis.

THANK-YOU VERY MUCH,  
Dr. Drolet!

## Juvenile Rheumatoid Arthritis A Dramatic Case

*Mr. and Mrs. Couture with their son, Martin*

### **The most serious case treated at the CHUL.**

Martin has had juvenile arthritis since the age of thirteen. His body is crammed full of anti-inflammatories.

We have had the system for five months, and two months ago Martin started to reduce his doses of medication, without consulting his doctor. He went from 20 mg of Cortisone to 2 mg, and from 1000 mg of Naproxen to 500 mg.

My boy has to have monthly check-ups at the CHUL. Last Friday he went to see his rheumatologist, Charlotte Grondin. When she saw him she said, "Do you take your medication? He said: "Yes". She replied,

***"That's impossible. You're telling me fibs. The swelling has all gone down. Tell me the truth." He answered, "The truth is that we bought the RHUMART system five months ago."***

She said, "Martin doesn't trust me, so I can't trust him. Why should I continue to look after him? It costs the taxpayer a lot of money."

Martin was completely lost after her brain-washing. She told him he would never get better. She added he had chronic arthritis and he should face facts:

### **IT'S FOR LIFE!**

To make a long story short, in the last two months Martin has started to enjoy life. He's able to smile and to play jokes - he's even starting to get on my nerves! I think he's starting to feel like a normal boy.

It's interesting to see the changes since he started to use the RHUMART system. Dr. Grondin noticed that there was less inflammation...

Now he can get through the nights without pain. I no longer have to give him Tylenol at 5 a.m. so that he'll be able to get out of bed in the morning. And I don't have to give him breakfast in bed now either.

I think that a lot of his problems were caused by the huge doses of medication that he was taking: 1000 mg of Naproxen every day - that's more than you would give a grown man.

**RHUMART is our last hope**, because we've tried chiropractors, acupuncture, iridology and the "Sunrider" products - just about everything.

For now things are going very well with RHUMART and Martin is really confident. He says he's going to get better:

***"I know in my heart I'm going to get better - that I won't have to have plastic hips, and that I'll be able to play hockey again like before."***

(He was supposed to get plastic hips this winter but the operation has been postponed until July.)

Martin Couture and Dr. Jean Charlebois

Denise Couture

## **Juvenile Rheumatoid Arthritis** **A Message of Hope**

I want to offer a word of encouragement to Mrs. Denise Couture, whose son Martin has the most serious case of juvenile arthritis treated by the CHUL. I want to talk to you about my son, Julien. I bought the RHUMART system for him. His case of juvenile rheumatoid arthritis was a bit like Martin's. Julien is 15 now; he was 12 when we discovered he had rheumatoid arthritis.

**On November 16 we had official medical confirmation from Doctor Grondin: no more juvenile rheumatoid arthritis!** I didn't even tell them that Julien had been undergoing RHUMART conditioning for the past several months. There didn't seem to be any point in mentioning it.

I can't get over how well our boy is doing.

**I think you will help your son with RHUMART too.**

# Pilonidal Cyst

## After the 8th RHUMART Session There Was Nothing Left

When I was 18 I had to have an operation to get of a **pilonidal cyst**. It was near my tailbone. **I had had it since I was born:** it seems that sometimes they grow and sometimes they don't. **A doctor had already opened it up: it was full of pus, hair, bits of teeth,** all kinds of stuff. He inserted a gauze and it went away.

But three months later it was back. **I went to see a surgeon. After examining me he said, "Oh, it's a pilonidal cyst. You've got to have an operation,** but first we have to get rid of the cyst." So I spent eight days in the hospital. That was 18 years ago.

A few months ago **my daughter was facing the same situation. The first time it happened, she was pregnant** (interesting!). Because of her condition, **the doctor simply opened it up locally,** but he said the problem would come back and he would have to operate at a deeper level to get rid of it completely. As he had predicted, the cyst came back after she had her baby.

I already had my RHUMART system then, so I told her, "Come and see me before having your operation."

I didn't really know how to treat that kind of problem, so I asked Marcel Derenne, who had sold me my system. His wife is a nurse and she knows all about pilonidal cysts. We gave my daughter ten RHUMART conditionings with the two

pads placed on top of the tailbone with both south polarities facing the back. We used the parameters

**A6-n3-T10**

**Dr. Drolet** - Did the cyst disappear completely?

**Mr. Roy - Yes.** After the third session she had a lot of trouble walking - and sitting too. She walked like a robot because her underwear was rubbing against the sore spot. She told me, "I think you're making it worse." So I said, "Look at the User's Guide. It says that **before the problem disappears it could get a little worse.** Don't give up. I know it'll work."

**She continued the sessions and the cyst slowly started to disappear. After the eighth sessions there was nothing left,** but I said, "Come two more times just to be sure."

**Dr. Drolet** - How old is she?

**Mr. Roy** - She's 21.

**Dr. Drolet** - She's completely cured?

**Mr. Roy** - Completely cured.

**Dr. Drolet** - How long has it been?

**Mr. Roy** - About a month and a half.

**Dr. Drolet** - And everything is still fine?

**Mr. Roy** - Still fine.

**She doesn't need an operation now because RHUMART® got rid of the cyst.**

## Blocked Ear, Eczema, Asthma, Circulation

# Quality of Life

*"I fell  
in love  
with  
this  
system!"*

We bought our RHUMART system after my husband had a heart attack because we wanted to increase his resistance a little bit. But I ended up literally monopolizing it.

I had a problem with my ear for about seven and a half years: it would plug up. I consulted three different E.N.T. specialists. It must have been psychosomatic because they couldn't find anything wrong. But it really affected **my quality of life**. I didn't know where to turn for help. I used the system three times for about five minutes at a very low level. After that I felt fine for weeks.

I continue to do global conditionings, but every once in a while when I'm feeling a bit nervous, I use the REBONE-4A on my ear for five minutes at amplitude 3 and the feeling goes away. Once I was afraid the problem wouldn't go away and I put the REBONE a little higher on my head. That made me sick to my stomach. I didn't feel well at all.

I also had eczema for several years. I practically lived on **cortisone**. That's gone too.

I have literally fallen in love with this system. **I couldn't do without it now, because it has really improved our quality of life - for both my husband and myself - in every way.**

I was also able to help an elderly woman with poor blood circulation. She always had bruises caused by broken veins and, although she didn't tell me at first, she had also been asthmatic for many years. One day she said to me, "You know, I don't need to pump my lungs any more." **She has no more asthma attacks now and she is doing very, very well.** She only needed ten to fifteen RHUMART sessions at the rate of three a week.

### **A Warning from Dr. Drolet:**

I would like to remind you that when selecting the amplitude for sessions involving the head it is important not to overdo it. Amplitude A3 with the REBONE-4A on the head is very high. Many people work with amplitude A1 or A2 and get very good results.

People tend to think that the higher the intensity, the faster they will get results, but sometimes it's just the opposite.

**DORIS SIMARD**, Québec, March 1990

## How to buy your own RHUMART System... when you haven't got a cent!

Hello! I would like to tell you how it's possible to buy a RHUMART system when you haven't got a cent in the bank. Lots of times people tell us, "I haven't got any money." Well, I didn't either - I was broke. I was feeling very "burned out," and having a pretty hard time. I would make a decision one day, but feel helpless to carry it out the next.

After attending an information evening hosted by Francine Bernier, I decided - notice the words "I decided" - **that I would get a RHUMART system.** And I set myself a time limit. Not six months! I didn't say "I want," I said "I have" my system. **And to reinforce my decision, I said it to a friend.** You know, when you tell someone else about a decision you've made, it's like you make a promise to yourself. **It was as though I was compelling myself to do it.** So I said to my friend, "Aline, I don't know how I'm going to get the money, and I don't know what is going to happen. All I know is that I haven't got a cent, but someone, somewhere does have the money I need. And I'm going to get it! Next Friday, (I gave myself seven days) I will have my system. Someone will lend me the money or I'll win the lottery, but I will get it!"

Aline, in her very sweet voice, answered me: "If you need a guarantor, I'm here." That's when I understood! I understood that when every fibre of your being has resolved to do something, when you are absolutely **DETERMINED, it happens.** That really gave me a "lift."

**RACHEL GOSSELIN** • Montréal • September 1989 • Cassette Ri-T3 (in French)

On Monday morning I went straight down to a credit union (caisse populaire). And do you know who served me? The nicest, friendliest credit manager they had, who just happened to be the one who knew me the best. "Hello, Mrs. Gosselin. How are you?" "Very well, thank-you. I'm going to go into business with RHUMART."

***I needed it for myself and I only found one way to be able to pay for it: to go into business with RHUMART***

"What's that?"

I began to tell her about the RHUMART system.

I knew what I was talking about and I didn't lack for words. I had gone there for a loan, right? And I suddenly realized that, instead, I was selling her on RHUMART. WOW! I'm good; I'm capable! It was really fun!

She asked me a ton of questions about the possibilities of the system. She was sold! I had to remind her that I was there for a loan. "And I need \$5 000 to buy it."

I explained my whole plan to her: that I would host information evenings; that I already had a team; that I had already taken training and helped my friend to make two sales to qualify,

that another was in the bag... **"All I need, Michèle, is \$5 000 for three months.** You know I'm not working. I have no security to give you, but I do have a guarantor."

We all know that credit unions don't lend money without security. But it occurred to me that I had been doing business with them for 25 years and they knew me very well. "You know, Mrs. Gosselin, I'm going to try to get you the loan without a guarantor. Just give me 24 hours."

When I walked out the door I was so sure that I had the loan that I forgot all about it.

The next day the telephone rang at 10:00 a.m. sharp: exactly 24 hours later. The manager told me, "I've deposited \$5 000 into your account. You can write cheques on it right away." My legs were like rubber! I said to myself, "That's it. I'm on my way!" That was April 3, 1989.

***Two and a half months later, on June 23, I paid back my loan. I sold six systems from June 13 - 30.***

I had kept my word: three months and my \$5 000 loan was repaid.

*English translation: Deborah Blythe*
