

FDA: PROTECTOR OF THE PEOPLE? OR PUBLIC ENEMY #1?

The committee to investigate the Food and Drug Administration (FDA) has just completed a lengthy investigation into illegal activities of the FDA and has found a mountain of evidence of illegal actions.

You might be interested in knowing that our investigators have discovered that more than 150 of the highest ranking officials of the FDA owned stock in the drug companies they were supposed to be regulating. The FDA is the enforcement agency and a participant in a conspiracy to keep beneficial products off of the market while promoting poison and habit-forming drugs for their own financial interests.

Our researchers have found many all-natural cures for such ailments as arthritis, cancer, heart conditions, etc... Those products have been tested, proven effective, and are safe. They have no side effects, but they are kept off of the market by the FDA. The FDA says that the makers of these products may sell them if they don't tell you what the product can do for you; or they can tell you what the product can do for you; if they don't sell the products. You and I know that doesn't make any sense: but the FDA officials know that it makes money; (for them).

Fifteen years ago, doctors told me that I would be dead in three months. They wanted to give me chemotherapy (chemical therapy), which they admitted would kill me if cancer did not. I would be dead now if I had allowed them to give me chemical therapy (pumping manufactured poisons chemicals into my veins). I am alive today only because health-food stores provided me with the necessary information to overcome cancer.

I remember as a kid, reading and hearing on the radio that the cancer rate was 1 in 200 people. It scared me half out of my wits, but I was assured that the doctors and the FDA would soon find a cure for it.

For the last 50 years the cancer rate has gotten worse every year. The FDA has approved thousands of drugs that cause cancer. The FDA is still approving new cancer causing drugs and food preservatives. Now the cancer rate is 1 in 3 people. The cumulative effects of the FDA approved drugs are killing us by the millions.

More Americans have died from the side effects of FDA approved drugs than from all the wars this country has been in, in his entire history. The money spent on cancer would pay off the national debt.

Information about the side effects of FDA approved drugs is taken directly from the PDR (Physicians Desk Reference). The information in the in the PDR is provided by the drug companies that manufacture the drugs. The PDR is available in any library and any well stocked book store.

The FDA knew about the side effects before they even approved the drugs. The FDA has and is still approving life-threatening drugs knowing that they are fatal to millions of people, while keeping safe products off of the market.

The FDA's only claim to jurisdiction over the safe products is by proclaiming that if you make health claims for a product, it then becomes a drug. If you don't make claims, it is not a drug. In other words, a product either is or is not a drug based solely upon what you say about that product, not on its chemical composition. (Congress has enacted no such law.)

I say investigate the FDA and find out why they are getting away with killing innocent people. The only justification for the existence of the FDA is to keep dangerous products off of the market: They have done exactly the opposite of that. They have approved thousands of lethal drugs while banning thousands of safe products that save lives, by harassing and threatening the manufacturers and distributors of these products. There is a lot more money to be made in continued treatment than there is in healing. The average M.D. has fewer than 500 patients for more than 90% of his income. If each doctor cured 2 people a day, they would be out of business in 1 year. The FDA is run by doctors.

You can help put an end to this disregard for human life and health if you will call or write your congressperson today and ask for a congressional investigation of the FDA. Write today! The life you save may be your own!!

Congressperson, U.S. House of Representatives, Washington, DC 20515
