AS⁹ Project: Appendix A1: Background Information

The Therapy of the 21st century
ANTI-PAIN...REGENERATING™

→ for 20 years already! ←

**WITHOUT DRUGS
OR PILLS**

Do you suffer from
STRESS - POOR PHYSICAL CONDITION
high blood pressure - arthritis - bone fractures - wounds - sprains - lesions -
bursitis - chronic pain - migraines - nervousness - burns?

Photographs of the first RHUMART® systems marketed in Canada: in 1980 by Rodrol Instrumentation Inc., in 1983 by Médecine-Bioélectrique (MBI) Inc., and in 1990-91 by DMBI

RHUMART® therapy promotes the growth, maintenance, and repair of cells for applications in the fields of orthopedics, rheumatology, and traumatology.

Let us help you improve your physical condition with techniques that are both natural and revolutionary!

**Bioelectricity
through
RHUMART® therapy**

The effectiveness of this therapy was proven **clinically and experimentally** in 1982 in 450 case studies carried out by clinicians and independent researchers. The conclusive results of this investigation and several other studies, presented in volumes 14En and 7Fr of the Mikal Encyclopedia are available from the present Web site. See the Section entitled «Moore Info».

In 1999, more than 300,000 people were treated with this system every day on five continents.

The principle underlying the operation of the **RHUMART®** system is the **electrophysiology of the nervous system**, as explained in Volumes 3Fr and 13En of the Mikal Encyclopedia.

This avant-garde therapy uses **unique low-frequency electromagnetic impulses**, the technology of which has been **patented** in Canada, the U.S., England, Japan, and elsewhere.

The RHUMART® bioelectric impulses induced in the human body are very effective for **promoting the repair and regeneration** of living tissue.

This technology helps human beings to gain, maintain, or reestablish control of their **physical and mental well-being** through its **anti-pain, anti-inflammatory, and regenerating effects**.

It is not "medicine," and anyone committed to improving their health **can benefit from this simple, effective, and extremely safe procedure**. A gentle, natural, yet revolutionary technique inducing bioelectric conditioning and relaxation, it was developed by **Dr. Roland A. Drolet**, B.Sc.A., M.A.Sc., and Ph.D. (University of Toronto), during more than fifteen years of research in electrophysiology and **Regenerative Bioelectricity**.

AS⁹ Project: Appendix A2: General introduction

The AS⁹ project is an excellent program encouraging you to take control of your own life and your own physical well-being using the most effective natural methods, including the RHUMART® Self-Health™ system developed by Dr. Roland A. Drolet (Ph.D. in Biomedical Engineering, University of Toronto, 1971; Master's in Applied Science and B.A.Sc. in Engineering Physics (magna cum laude) from Laval University in 1967).

This Self-Health™ system is now being used on a regular basis by more than 300,000 people throughout the world. It has helped thousands of committed users to reduce their STRESS and the suffering related to a wide variety of health problems, including

high blood pressure, arthritis, bone fractures, stomach ulcers, STRESS, backache, chronic pain, sprains and other sports injuries, bursitis, other injuries, chronic fatigue, depression, nervousness, premature aging, cancer, and even a few advanced cases of AIDS (the incredible results obtained with the RHUMART® Self-Health™ system in the latter cases could well be explained by the **Anti-STRESS and immune-system-reinforcing effects** observed in thousands of users.)

To judge for yourself the authenticity of the results obtained with this Self-Health™ System, you are invited to view many of the **100 video testimonials presented in French, English, and Spanish** on the two compact disks called "**The Golden RHUMART® CDs-Vol.1A and Vol.1B.**"

These CDs also include introductory **lectures by health-care professionals, user's courses**, and the general index (Volume-22Fr or 22En) of the Mikal Encyclopedia. This index includes summaries of eight volumes in seven languages (**French, English, Spanish, German, Italian, Japanese, and Mandarin Chinese**). The Mikal Encyclopedia is published by the international RHUMART® institute (iRi).

Volumes 3Fr, 4Fr, 9Fr, 9En, and 13En of this encyclopedia provide a general introduction to the RHUMART® phenomenon, the results obtained with the RHUMART® Self-Health™ system, and the comprehensive approach to health practised by Dr. Roland A. Drolet since 1971.

Volumes 7Fr and 14En of the Mikal Encyclopedia contain scientific reports of the extremely varied results achieved to date and the physiological nature of the RHUMART® phenomenon.

In addition, with a click of the mouse, the **Golden RHUMART® CDs** will take you to the RHUMART® Web site (www.rhumart.com). This site will contain important, up-to-date information for iRi researchers and agents.

The RHUMART® system is based on the electrophysiology of the nervous system, which enables it to induce several **physiological effects that are essential** to improved health and quality of life. These are:

- **Relaxation of the nervous system**, inducing peripheral vasodilation;
- **Improved blood circulation**, leading to reduced inflammation and thus pain; these effects tend to block or reverse the degenerative processes involved in arthritis, for example;
- **Improved communication** between cells, tissues, organs, **and living beings resulting**, among other things, in reduced **STRESS and reinforcement of the immune system**;
- **Stimulation of normal cell regeneration**: this is a vital component of healing resulting from the above-mentioned effects.

In short: "Health and Well-being are too important to be left only in the hands of the experts!"
(*Marc-Yvan Côté, Quebec's Minister of Health and Social Services, 1990*)

Conditions of Agreement

1. **The preliminary declaration of the researcher and the preamble** overleaf as well as all the appendices attached to this document, namely A1, A2, B1, B2, B3, C1, C2, and D1, form an integral part of this agreement.
2. **Eligibility:** the eligibility of the researcher will be determined by iRi **based on the researcher's initial declaration (Appendix B1) concerning his or her training, major activities, and motivation for active participation** in this project.
3. **The independent researcher agrees to follow the administrative directives** issued by iRi and distributed via memos or News letters on the Web site (www.rhumart.com), by mail, or otherwise, in addition to the initial directives attached to this document.
4. **Research reports:** the researcher agrees **to provide duly completed research reports accompanied by a written testimonial** (between 1/2 to 3 pages in length, in electronic form, accompanied by a print-out) including the initial declarations (Appendices B1, B2, and B3) and the follow-up reports (Appendices C1 and D1) after 3 months, after 6 months, and then every six months for the remainder of the project, **for a total of 5 years**; with iRi's approval, the participation of the researcher may be modified for cause.
5. **iRi agrees** to make available to the researcher its **semi-annual News Letters** concerning the status of the project (via the Internet) as well as iRi's **annual report** on the project.
6. **The Self-Health™ system lent free of charge to the researcher** within 45 days of iRi's decision and the acceptance of the researcher, dependent upon the availability of RHUMART® systems: for the duration of the project, conditional upon compliance with this agreement, iRi will lend a Self-Health™ system generating various modulations of RHUMART® impulses (which are fully described in the invention patents listed on page 345 of Volume 9-Fr and Volume 9-En of the Mikal Encyclopedia, particularly in U.S. patent No. 5,620,463;
7. The following constitute **"Events of Default"** under this agreement:
 - failure of the researcher to provide the written reports and testimonials as specified in provision 4 above;
 - failure of the researcher to comply with the recommendations of the manufacturer of the system used and those of iRi concerning, among other things, the manufacturer's warranty and the range of parameters suggested in iRi documentation; (within those limits, the researcher may vary the conditioning parameters in order to obtain the best possible results);
8. **Option to purchase the depreciated system:** at the end of his or her active participation in this research project, the researcher may purchase the Self-Health™ system that is lent to him or her by iRi for the sum of \$250, inflation indexed; it is understood that this amount in no way reflects the new value of the system, but rather refers to the residual value of the system after several years of regular use.
9. **The researcher acknowledges that the system lent to him or her under the terms of provision 6 above remains the exclusive property of iRi throughout the length of the project and that iRi may reclaim the system at its sole discretion should the researcher default, with no obligation to provide any compensation to the researcher;** in such case, the researcher shall lose the option to purchase described in provision 8 above.
10. **Returning the system:** Should the researcher not exercise the option to purchase described in provision 8 or should he or she default, the researcher agrees to return the loaned system, at his or her own expense, to the address of the national or international iRi warehouse posted on the RHUMART® Web site (www.rhumart.com); An agent authorized for this purpose may also take possession of the system to be returned and immediately forward it to an official iRi warehouse;
11. **Maintenance of the Self-Health™ system:** it is the responsibility of the researcher to maintain the system lent by iRi in good working order, and the researcher agrees to have the system repaired or examined, at his or her own expense, by an authorized service agent; **the cost of transporting the system to be repaired or examined** will be assumed by the researcher, even during the manufacturer's warranty period;
12. **Researcher compensation: it is agreed that the sole compensation owed to the researcher is in the form of the results obtained with the loaned Self-Health™ system, however great or small they may be.** No other form of compensation shall be owed to the researcher aside from the Self-Health information that shall be provided to the researcher from time to time, via the Web site: «www.rhumart.com» or otherwise, either free of charge or at a price that shall be agreed upon by the researcher;
13. **Governing law:** The researcher shall comply with and conform to all applicable laws governing the use of the loaned system and materials. Legal relations between iRi and the researcher shall be governed according to the Common Law, and for this purpose the parties elect domicile in the Judicial District of Quebec City. This agreement shall be binding upon and enure to the benefit of iRi and the researcher and their respective heirs, successors, administrators, and assigns.
14. **Changes to this agreement:** No changes to this agreement shall be valid unless they have been agreed upon in writing by the parties, and any verbal agreement made by an iRi employee, authorized independent agent (or recruiter) shall not be binding upon iRi.
